

# Structured for Success

Behind every success, there is a Story that led to that Success!

**In order for success to take place in anything that you do in life, there is always steps or some structure you must undertake first!**

The steps of a good man are order by the Lord; and he delighteth in his way Psalms 37:23, Proverbs 3:5-6  
Lean not unto thy own understanding.

# You have to have a Goal set before success can take place!

**G**od's  
**O**rder  
**A**ctivate  
**L**egitimacy

Let all things be done decently and in order  
1 cor.14:40

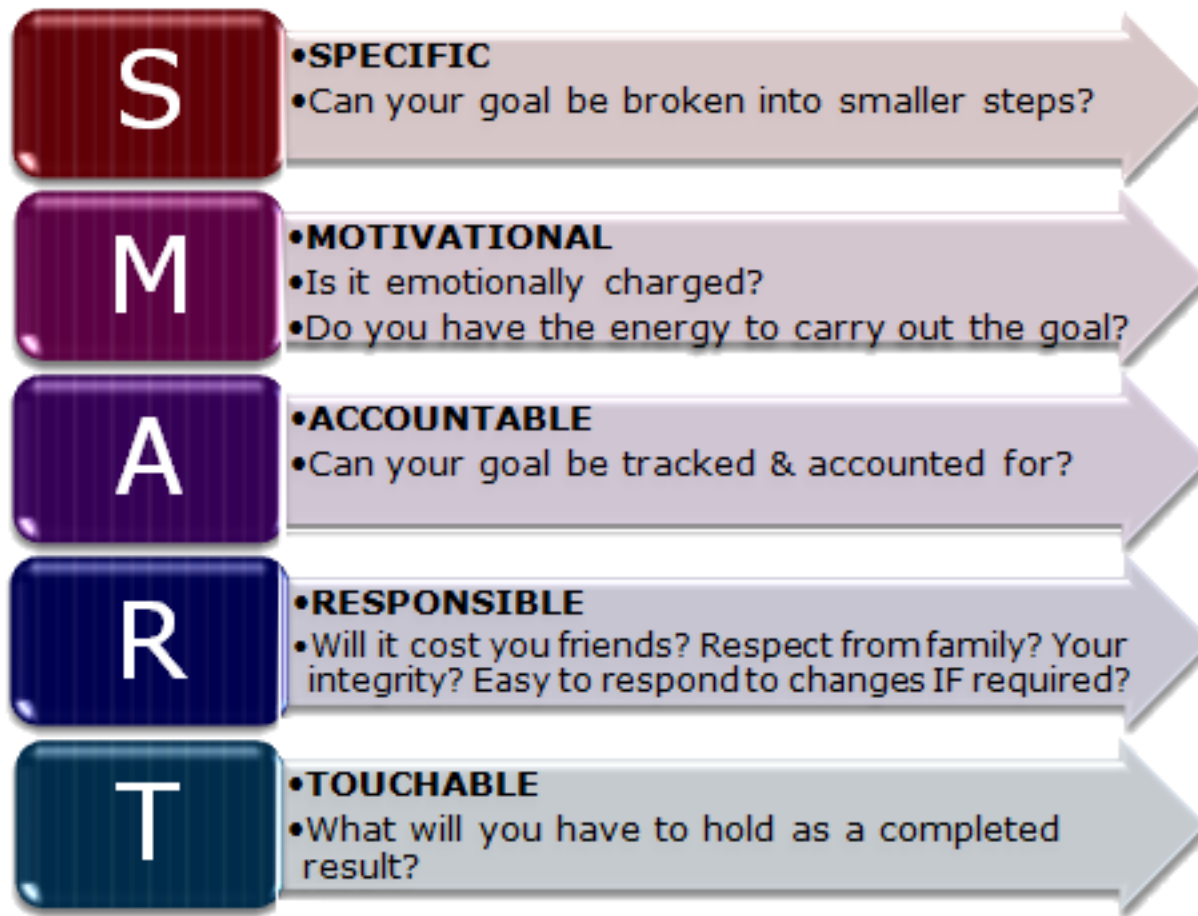

# The Smart thing to do!

There are 5 basic things you should establish first, before starting your pursuit for success!

They are:

- 1) Specific
- 2) Measurable
- 3) Assignable
- 4) Realistic
- 5) Time based

In business they call it Being “ SMART ” !

For which of you, intending to build a tower, sitteth not down first, and counteth the cost, whether he have sufficient to finish it? Luke 14:28

Every good Goal start off with a specific Foundational Structure! For example when building a Building: look below.

You need the right tools to Start!

There is a method to what seem sometime to be madness ! Take note of the Dia. Below:

**1.** Stake out lines for the wall. Dig a trench twice the width of the footing. First wall courses will be below grade.

**2.** Place 6 inches of gravel in the trench for drainage and level it using a garden rake.

**3.** Stake the forms, making sure they are perfectly level and square. Drive stakes on the outside of the forms.

**4.** Coat forms with old motor oil for easy removal later. Pour concrete to top of forms.

**5.** Screed concrete by seesawing a 2×4 along top edges of forms, removing excess concrete as you go.

If the ground is hard, you can pour concrete without forms. Dig a straight-sided trench the width of the footing.

And I say also unto thee, that thou art Peter, and upon this rock I will build my church; and the gates of hell shall not prevail against it. Matthew 16:18

# Continued:

**1.** Before mixing mortar, dry lay first course on footing. Use wood strips for joint spacing. Mark spacings on footing.

**2.** Set the end block in a bed of 2-inch-deep mortar. Butter and set second block with smaller holes down.

**3.** Check for level and plumb every three blocks. Tap blocks into mortar with trowel to make adjustments.

**4.** Build corners or ends after first course. Check with level and story pole. If off, pull blocks and start again.

**5.** When corners are four courses high, stretch a line between them. Mason's line blocks hold line taut.

**6.** Lay blocks between corners level with line. Lift blocks into position; don't slide them. Alternate block joints.

**7.** Butter both ends of last block in a course and ends of adjacent blocks. Carefully slip block into position.

**8.** Use solid caps to top off the wall. Or, sandwich mesh in last mortar joint and fill block cores with mortar.

**9.** Use joint strike or pipe to smooth mortar (see page 211). Finish by wiping joints and faces with burlap.

**It a Structure Process so Hole on for the Ride!**

**Never give up, An never surrender**

# IT's Wise to strategize

# Strategize

# Prayer

Do not be anxious for nothing Phil. 4:6

# Educate

Wisdom is the principal thing; therefore get wisdom and with all thy getting get understanding. Proverbs 4:7.

# It's Time to Organize

“When organizing any project you should follow this flow.”

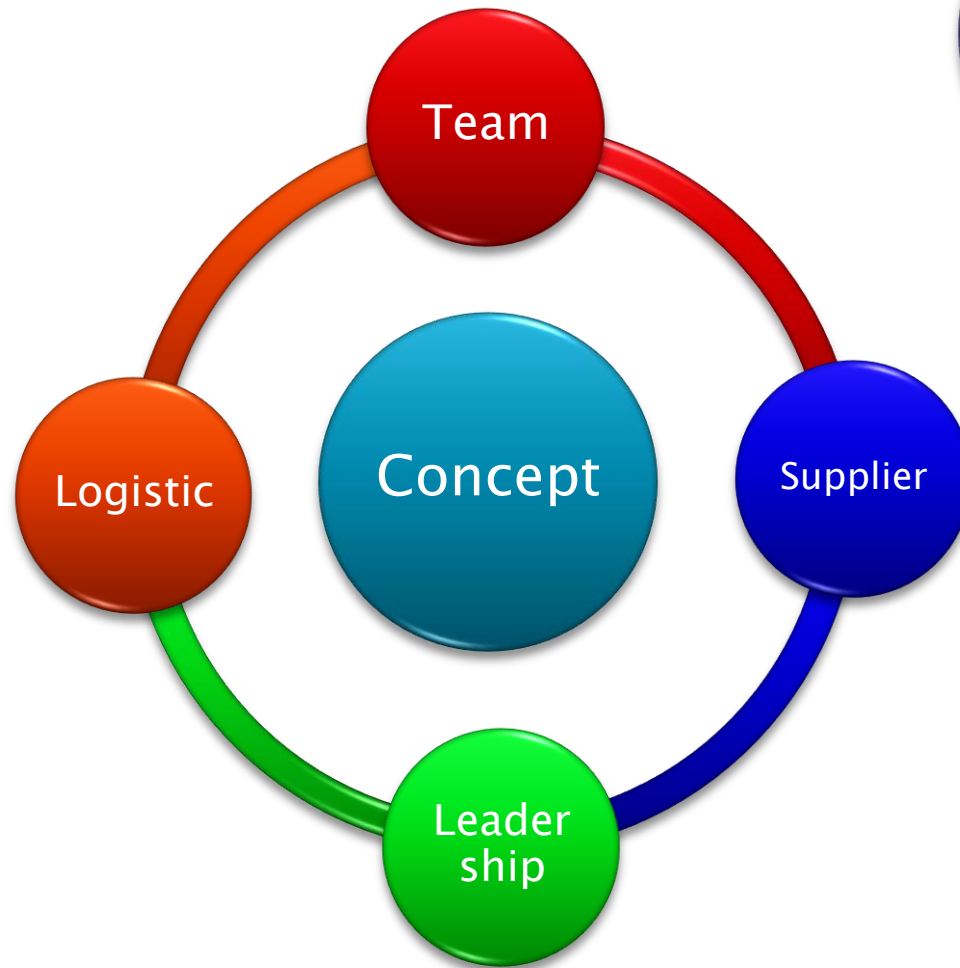

- 1.) Concept
- 2.) Leadership
- 3.) Team
- 4.) Supplier
- 5.) Logistic
- 6.) Results

With this Organize flow you will have success in all that you do!

Let all things be done decently and in order  
1 cor.14:40

# organize

- 1.) Concept
- 2.) Leadership
- 3.) Team
- 4.) Supplier
- 5.) Logistic
- 6.) Results

# Results

There is a way that seemeth right unto a man, but the end there of is the ways of death  
Proverbs 14:12

# The Beginning
